FaceCoT Dataset
Release Agreement for Academic Research

About the Release

FaceCoT is a research dataset designed to support the study of face understanding and reasoning. This release provides the text annotations and associated metadata made available by the FaceCoT team. Access is granted only to verified applicants for bona fide academic research and educational use.

Approval applies only to the applicant, institution, and research project stated in this agreement. A separate request is required for a different project, institution, external collaboration, or commercial use.

Terms and Conditions

By requesting or using the FaceCoT text annotations, the applicant agrees to the following terms:

- **Academic use only.** The materials may be used solely for non-commercial academic research or education under the project described in this application. Commercial use requires prior written permission from the FaceCoT team.
- **No redistribution.** The applicant may not share, sell, sublicense, publish, upload, or otherwise distribute the dataset, in whole or in part, to any person or organization not covered by the approved request.
- **No dataset reconstruction.** The materials may not be combined with other data for the purpose of identifying or re-identifying any individual.
- **Privacy and responsible use.** The materials must not be used to identify, track, contact, profile, discriminate against, or infer unrelated sensitive attributes of any person. They must not be used for surveillance, deceptive content, harassment, or other unlawful or harmful activities.
- **Controlled access.** Access must be limited to members of the approved research project who need the data for the stated purpose. The applicant must apply reasonable security measures and must not upload the materials to public repositories, public file-sharing services, or unapproved third-party AI services.
- **Research outputs.** Publications and presentations may include only the minimum examples reasonably necessary to explain the research. Outputs must not expose substantial annotation records, enable reconstruction of the dataset, or disclose information that could reasonably identify an individual.
- **Citation.** Any publication, report, software, or model resulting from use of the release must acknowledge the FaceCoT dataset and cite the following paper:

  > Honglu Zhang, Zhiqin Fang, Ningning Zhao, Saihui Hou, Long Ma, Renwang Pei, and Zhaofeng He. "Harnessing Chain-of-Thought Reasoning in Multimodal Large Language Models for Face Anti-Spoofing." In *Proceedings of the IEEE/CVF Conference on Computer Vision and Pattern Recognition (CVPR)*, pages 33566–33576, 2026.

- **Termination and responsibility.** Access may be revoked for a breach of these terms or when necessary to address legal, ethical, privacy, or security concerns. Upon request, the applicant must stop using the materials and delete all copies. The applicant is responsible for all use made under this request and for any loss, claim, or damage arising from misuse, to the extent permitted by applicable law.
- **Submission.** After completing the application form below, the applicant must send a complete PDF copy of this agreement to `fangzhiqin@bupt.edu.cn`.

Application and Declaration

Please complete every applicable field. Use an institutional email address. For a student applicant, the supervisor or principal investigator information is also required.

Project Title	
Brief Purpose and Intended Use	
Applicant Full Name	
Title / Designation	
Institution / Organization	
Institutional Email Address	
Country / Region	
Supervisor / Principal Investigator	
Supervisor Title / Designation	
Supervisor Institutional Email	
Applicant Signature	
Date (YYYY-MM-DD)	

Applicant declaration. By signing above, I confirm that the information in this request is accurate; I have read and accept all Terms and Conditions in this agreement; and I will ensure that all authorized project members comply with them. I understand that access is limited to this approved request and may be revoked for non-compliance.

Send the completed agreement from your institutional email address to the official FaceCoT dataset contact. Approved applicants will receive access instructions by email.
